 - Completion of the PPE Inspection module
 - Completion of the Partner rescue module
 - Completion of National Workplace Trainer & Assessor qualification (TAE)
- Duration
 - 1 day
- Documents provided
 - Certificate of competency in conducting Petzl Work at height modules 1 and 2
- Price ex GST \$POA

Contents

- Requirements of Petzl trainers
- Tools available for conducting a Petzl Work at height module
- Knowledge of energy absorbers related to the ABSORBICA line
- Knowledge of risk assessment
- Good understanding of permanent and temporary PPE systems
- Explaining and setting up various workshops

Why this training?

- The Petzl one-day Work at height – trainer module is designed to help trainers & assessors provide content and develop the knowledge of a worker participating in the Petzl Work at height module. The trainer will be able to explain how to select a system based on a risk assessment.

For whom?

- Petzl Technical Institutes
- Petzl Technical Partners

Goals

- Present and understand the Work at height – user module
- Provide clear answers using the available educational tools
- Gain a deeper understanding of fall-arrest equipment
